

## ***Vacuum 12***

The Tecla Vacuum 12 vacuum packaging machine is a robust and reliable machine capable of satisfying the most demanding professional users.

The overall dimensions are limited: the optimization of work spaces was the subject of particular attention in the design of the Vacuum 12 packaging machine, which can also be used in those environments which, by their nature, do not have much space.

The bodywork, made entirely of steel, gives the packaging machine a pleasant and professional appearance while at the same time making it easier to clean and making it durable over time.

Using this vacuum sealer is very easy! The controls are simple and intuitive, the buttons are large and positioned in such a way as to be easy to reach, as well as particularly resistant: even intense use will not compromise its functioning.

Vacuum 12 by Tecla is able to work with any type of vacuum bag: the vacuum is created indifferently in smooth or embossed bags.

<b>Technical specifications</b>	
<b>Model</b>	Vacuum 12
<b>Voltage</b>	230 Volt - 50 Hz
<b>Power</b>	400 W
<b>Sealing bar</b>	380 mm
<b>Vacuum pump</b>	Self-lubricating, 16 L/min
<b>Cycle Control</b>	Electronic card
<b>Material</b>	Brushed stainless steel
<b>Weight</b>	8 Kg
<b>Sizes</b>	425 x 260 x 150 mm
<b>Regulation</b>	CE
